Featured Guarantees

Purchases of the products above are foundational products for the following GreenTrust 365 guarantee programs:

Spring Dead Spot + Take-all Root Rot Guarantee

Spring dead spot and take-all root rot are among the most damaging diseases of bermudagrass putting greens throughout the transition zone. These diseases attack during the fall and spring when temperatures are growing slowly, with the potential to cause long-term damage or, in the worst case, complete green failure. The guarantee covers up to 100 days of protection for your greens.

- **Guarantee:** If you apply the product on time, you are guaranteed 100% protection against Spring Dead Spot and Take-all Root Rot for up to 100 days.
- **Application:** Apply to the greens in the fall and spring when temperatures are between 50°F and 70°F.
- **Exclusions:** This guarantee does not cover damage caused by other diseases, insect damage, or other environmental factors.

SPRING DEAD SPOT CONTROL BY CHEMISTRY: SPINATOLADAZOLE

Spinatoladazole is a systemic fungicide that controls Spring Dead Spot and Take-all Root Rot. It is a member of the DMI class of fungicides. It is highly effective against these diseases and is safe for the environment.

Application	Application Rate	Application Rate
1	August 15th	Spinatoladazole 0.5 lb/A
2	September 15th	Spinatoladazole 0.5 lb/A
3	October 15th	Spinatoladazole 0.5 lb/A
4	November 15th	Spinatoladazole 0.5 lb/A

Spring Dead Spot + Take-all Root Rot Guarantee

Large Patch Prevention Guarantee

Protect your greens against Large Patch disease with a Syngenta Large Patch Guarantee.

Large patch disease is a fungal disease that is most common in the fall and spring. It is caused by the fungus *Stenomyces macrosporus*. The disease is characterized by large, irregular patches of dead grass that are often surrounded by a ring of healthy grass. The disease is most common in areas with high traffic, such as tees, fairways, and greens.

Introducing a New Perspective to Preventing Large Patch

Now with Azoxystrobin fungicide, the Large Patch Prevention Guarantee, along with Chlorpyrifos insecticide, provides holistic disease prevention.

Large Patch Control in 2021 (Source: Golf Course Industry, 10/20/21) (Dr. Jan Korman, NC State University)

Here's your Guarantee:

- If you apply the product on time, you are guaranteed 100% protection against Large Patch disease for up to 100 days.
- The guarantee covers up to 100 days of protection for your greens.
- The guarantee covers up to 100 days of protection for your greens.

There's more to this guarantee than meets the eye. The Large Patch Prevention Guarantee, along with Chlorpyrifos insecticide, provides holistic disease prevention.

Snow Mold Guarantee

Snow mold disease can be a major problem for your greens in the winter. It is caused by the fungus *Sclerotinia homocarpa*. The disease is characterized by irregular patches of dead grass that are often surrounded by a ring of healthy grass. The disease is most common in areas with high traffic, such as tees, fairways, and greens.

Protect your Greens and Tees for up to 100 Days

Do you have a Snow Mold problem? The Snow Mold Guarantee, along with Propiconazole fungicide, provides holistic disease prevention.

Powerful combination for up to 110 days of control

Do you have a Snow Mold problem? The Snow Mold Guarantee, along with Propiconazole fungicide, provides holistic disease prevention.

SPFIC adds 5 extra days of protection

10 days of control. That's the power of Snow Mold Guarantee, along with Propiconazole fungicide, providing holistic disease prevention.
