LIQUID KELP w/BIOS

**A Fertilizer Solution derived from Seaweed and BioStimulants
for Feeding Turf, Trees, and Ornamentals**

Liquid Kelp w/BIOS utilizes the seaweed extract, *Ascophyllum nodosum*; the most researched marine plant species for use on land plants in the world. *Ascophyllum nodosum* grows in extreme conditions and is harvested from the cold, clean North Atlantic. This extract is a form of algae known for its agricultural benefits. It is full of plant hormones, and amino acids help that which helps the plant break down its food into useable sugars.

Jay-Mar Liquid Kelp w/BIOS also contains a special blend of biostimulants and vitamins to encourage healthy plant cell growth, strong root development, and greater nutrient uptake.

Derived from: Seaweed Extract (*Ascophyllum Nodosum*), Molasses, Multi-Gro, Vitamin B12, and
